# Lazio Construction Company – Site Plan

## Company Description

Lazio Construction Company specializes in:

- Construction works
- Drawing and interpreting building plans
- Training students interested in construction
- Providing employment opportunities to skilled individuals

Currently, the company's primary focus is managing construction projects, preparing building plans, and interpreting them. Other services will be expanded progressively.

**Target Clients:** Primarily individuals aged 40 years and above.
**Location:** Bbunga, Uganda
**CEO:** Benard Mathew (aka Lazio)

## Mission

To provide reliable and efficient construction services built on expertise, innovation, and integrity while offering professional training that equips learners with practical, industry-ready skills.

## Vision

To become the region's leading construction company—renowned for excellence in building, training, and community empowerment—while creating a future where every structure reflects progress, safety, and pride.

## Goal

To deliver innovative, sustainable, and high-quality construction solutions, while nurturing skilled professionals and creating opportunities that positively impact lives and communities.

# Functional Requirements

- **Admin Dashboard**
  - Register clients, items, and credentials
  - Upload pictures and videos of company activities

    - Full CRUD operations
    - Manage client details and records
- **Public View Area**
    - Showcasing company activities and updates (open to all)
- **Client Portal**
    - Clients can log in to view their invoices (displayed in tables)
    - Option to download/print invoices as PDF
- **Notifications**
    - Admin and clients receive relevant notifications
- **Role-Based Access Control (RBAC)**
    - Admins: redirected to admin dashboard
    - Clients: redirected to personal invoice/records page

# System Structure

- **Header:** Company logo, name, and navigation menu (Home, Services & Deliveries, Sign Up, Login)
- **Footer:** Quick links, contact info, social media, and "About Us" (shown in modal)
- **Home Page:**
    - 3D animated company logo
    - Hero section with an inspiring message
    - Display of company Goal, Vision, and Mission
    - Company activities (slideshow of pictures/videos with detailed view button)
    - Leadership section with pictures and hover-carousel displaying details
- **Activity Page:** Filterable display of company activities
- **Client Page:** Invoice table with PDF printing option
- **Admin Dashboard:**
    - Sidebar (toggleable) with parent/child menu structure
    - Main area with statistics and embedded content
    - Features for client registration, item registration, login credential assignment, and invoice design

# Technologies to be Used

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, AJAX, jQuery
- **Backend:** PHP
- **Database:** SQL (optimized for lightweight hosting on Infinity Free)
- **Data Format:** JSON
- **Hosting:** InfinityFree (Free Tier)

**Responsiveness:**
The system must be fully mobile-responsive, designed with mobile-first principles.

# System Flow

1. User lands on the homepage → can browse services and activities.
2. Login → system checks role:
    - **Admin:** Redirected to admin dashboard
    - **Client:** Redirected to personal client page (with personalized session data)
3. Session stores client details for continuity.
4. Welcome page greets user by name and shows time-based greetings (e.g., “Good Morning”).
5. Headers and footers are modular HTML files included using JavaScript.
6. One root CSS file (except for header/footer, which have their own non-conflicting styles).
7. Consistent color scheme tailored for the target client age group.
8. Notifications primarily for admin users.

# Database Design

- **Users Table:** Stores username and password.
- Uses foreign keys to link users to their corresponding records.
- Roles fetched from the database using ENUM for controlled access.
